

Evan Prens P. Exanes

Web Developer and SEO Specialist

Taguig City, Metro Manila, Philippines | +63 961 265 0198 | exanesevan@gmail.com

Portfolio: evanexanes.github.io | GitHub: github.com/evanexanes

SUMMARY

BS Information Technology student at Asia Pacific College who builds business websites in WordPress, Elementor and hand-written HTML and CSS, and handles the SEO behind them. Since April 2026, working remotely for a Swiss B2B sales and marketing company.

EXPERIENCE

Junior Web & Digital Support

Tecadvance GmbH, Hallau, Switzerland (remote) | April 2026 – Present

- Wrote 28 English B2B articles of 2,000 to 2,500 words each for the company blog, working from SEO briefs that set the title, focus keyword, meta title, meta description and slug.
- Built the 28 matching German pages in WordPress and Elementor and paired each with its English version through Polylang, then scheduled all 56 pages to publish in pairs.
- Linked every article into the site: each English article carries at least 10 internal links (median 12) and a median of 10 external sources.

PROJECTS

Portfolio website, evanexanes.github.io

HTML5, CSS custom properties, JSON-LD, GitHub Pages | 2026 | 8 case studies

- Hand-coded an 11-page portfolio on design tokens, with a light and dark theme and every text colour pair checked against WCAG 2.1 AA contrast.
- Added canonical and Open Graph tags to every page, an XML sitemap, robots.txt and three JSON-LD types; set noindex on 159 demo-site pages.
- Measured the site's 8 pages live with Lighthouse 12 on 5 October 2026: Performance 99 to 100 on mobile and 100 on desktop; Accessibility, Best Practices and SEO 100.

WordPress practice builds

WordPress, WooCommerce, Elementor Pro, Blocksy, Custom Post Type UI

- Built a WooCommerce store (30 products, 44 variations, 14 theme-builder templates), a travel blog (33 posts, a 17-place custom taxonomy) and a four-page company site.

School programming projects (two-person team projects)

Python, Java | 2026 | code at github.com/evanexanes

- MotoPulse (Python): a motorcycle maintenance tracker that serves the most overdue job first from a priority queue, with an undo stack and JSON storage.
- NCTN Bank (Java Swing): a banking app with deposits, transfers and history that locks an account after three failed logins.

SKILLS

Web development: HTML5, CSS (custom properties, responsive layout), WordPress, Elementor Pro, WooCommerce, ACF, JetEngine, Polylang, Wix, Git, GitHub, Figma, WCAG 2.1 AA basics
